SUMMARY

A motivated Electronics and Communication Engineering student with a strong interest in 5G networks, computer science models, and AI/ML, currently maintaining a CGPA of 9.06. Gained practical experience through a Google AI/ML virtual internship along with knowledge of networking concepts. Passionate about building innovative solutions that integrate hardware, software, and modern communication technologies.

PROFESSIONAL SKILLS

Video editing
Photoshop
adaptability & learning

communication
people management

TECHNICAL SKILLS

programming languages:
python,c,SQL,databases,quantum computing,
Embedded systems: arduino IDE
Microsoft Excel,power BI, microsoft word
Packet tracer.

EDUCATION

HIGHER EDUCATION

2024-2028

BACHELOR OF TECHNOLOGY, ELECTRONICS AND COMMUNICATION ENGINEERING
(currently studying in 4th semester).

MVGR COLLEGE OF ENGINEERING

PROFESSIONAL EXPERIENCE

GOOGLE-AIML virtual internship

october 2025 - dec 2025

- I recently completed the Google AI-ML Virtual Internship offered by Google, where I gained hands-on experience in Artificial Intelligence and Machine Learning. The program enhanced my skills in data analysis, model development, and problem-solving through practical approach.

CISCO- virtual internship

Jun 2025 - Aug 2025

- The Cisco NetAcad Virtual Internship 2025 enhanced my skills in networking, cybersecurity, and IoT through real-world simulations and guided projects, giving me hands-on experience with Cisco technologies and network troubleshooting.

PROJECTS

- participated in swecha 24 hours Hackathon and created a solution for real world problem.
- we as a team, created a web application, the site presents itself as an initiative to promote transparent,detect UI/UX dark patterns ,ethical subscription practices and fight misleading design in digital products.
- web application link: <https://webbuddy.vercel.app/>

IOT project:

- I developed an IoT-based Smart Home Automation project that uses ultrasonic sensors to automatically control lights, enhancing my skills in sensor integration and microcontroller programming. It provided practical experience in blending hardware and software for real-world automation.

ADDITIONAL INFORMATION

- Languages:** English, Telugu,hindi
- Certifications:** Network Essentials(CISCO-Networking Academy), Exploring networking with cisco packet tracer,quantum computing certification(wiser)
- Hobbies:** video editing,playing badminton, reading journals
